Software Updates

QRDA Cat I R5.1 schematron updated (CYPRESS-1959)

- Cypress 5.2 was running an outdated schematron for QRDA Cat I R5.1.
- As a result, Cypress would return an error for the following conformance statement.

This code SHALL contain at least one [1..*] translation, which SHOULD be selected from ValueSet
Problem Type urn:oid:2.16.840.1.113883.3.88.12.3221.7.2 2014-09-02 (CONF:1198-32848).

jump to error

- This conformance statement has now been removed and will not be returned as an error message.

Software Updates

CQL Calculation Engine updated to fix CVU+ calculations of Open Boundaries (CYPRESS-1924)

- A calculation bug in CVU+ impacts the calculation of logic like the following

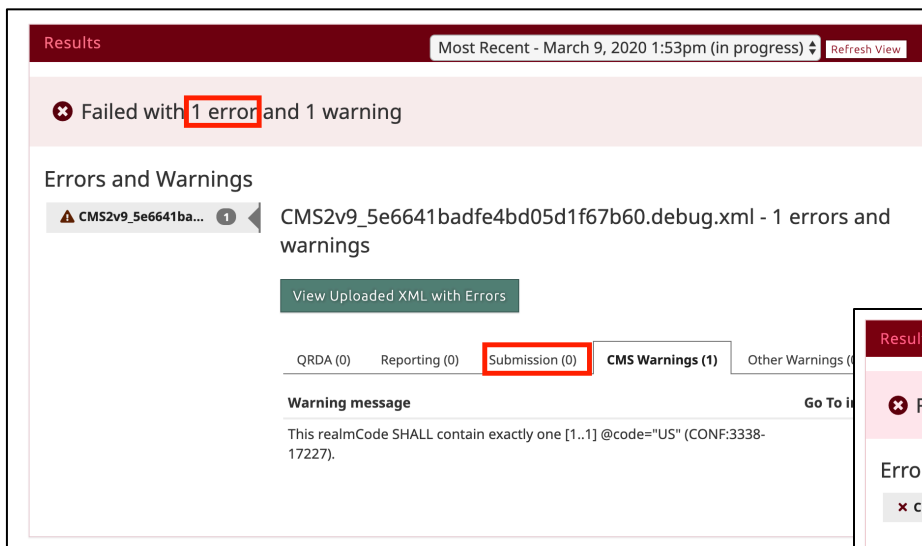

```
MI.prevalencePeriod ends 3 years or less before day of start of  
Encounter.relevantPeriod
```

- The CVU+ calculations were not accounting for the “day of” precision and allowed the “MI” to occur on the same day as the “Encounter”
- This impacts CVU+ calculations for the following eCQMs
 - CMS56v8, CMS90v9, CMS125v8, CMS133v8, CMS136v9, CMS137v8, CMS145v8, CMS154v8, CMS161v8

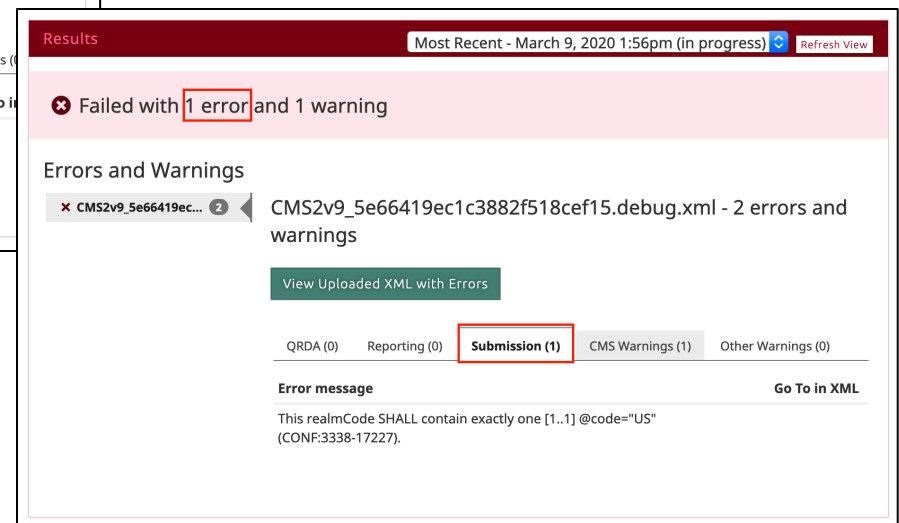

Software Updates

Submission errors were not being displayed for C1/C3 tests (CYPRESS-1968)

- When C2 was not selected, Cypress would not show Submission errors in the error table.
